

Ryan A. Ethier

Chicago, IL | U.S. Air Force Veteran | rethier@luc.edu | 774-318-0745
[linkedin.com/in/ryanethiercyber](https://www.linkedin.com/in/ryanethiercyber) | ryanethier.github.io/ryan-ethier-portfolio | github.com/Ryanethier

Cybersecurity student and IT professional with hands-on experience across identity administration, endpoint security, digital forensics, and security awareness operations. U.S. Air Force veteran with a background in security operations and personnel leadership. Comfortable working across enterprise IT systems, scripting and automating recurring workflows, and documenting technical work clearly for others.

EDUCATION

Loyola University Chicago — B.S. in Cybersecurity, GPA: 3.7 *Expected December 2026*
Minor: Computer Crimes and Forensics
Honors: Presidential Scholar & Dean's List
Certification: CompTIA Security+

EXPERIENCE

IT Service Desk Technician — Loyola University Chicago *May 2025 – Present*

Includes a mid-program internship in IT Administration at dbHMS, January – August 2026.

- Resolve an average of 50+ weekly tickets across MFA, VPN, Azure AD, and Microsoft 365, maintaining high customer satisfaction while troubleshooting complex platform issues.
- Authored 10+ knowledge base guides for common technical issues, reducing recurring incident volume and improving team efficiency.
- Provided frontline triage and escalation during a high-severity outage that drove a ~10x spike in call and ticket volume, documenting impact and coordinating early escalation to Network Services.

IT Intern (Information Technology Administrator) — dbHMS *January 2026 – August 2026*

- Served as one of two IT staff supporting the full employee base of a mechanical, electrical, and plumbing engineering firm, administering Microsoft 365, Windows Active Directory, and Azure Active Directory environments.
- Administered endpoint security and MDM tooling (Intune, Microsoft Defender, ScreenConnect) and managed Apple Business Manager iPad onboarding for a distributed device fleet.
- Executed a large-scale mailbox archival project, exporting 12 mailboxes (~218 GB) via Microsoft Purview eDiscovery and migrating data to AWS S3-compatible cloud storage using the AWS CLI.
- Operated a KnowBe4 phishing simulation and security awareness program, designing 3 campaigns and a Microsoft Forms survey to assess employee susceptibility to social engineering.

Security Forces Operations Controller — U.S. Air Force *2018 – 2022*

- Directed daily security operations for 120+ personnel, securing \$6.5B+ in national defense assets with zero mission-impacting incidents.
- Monitored 250+ CCTV feeds/logs and coordinated immediate emergency response to security breaches.
- Trained 12 Airmen on security protocols and compliance standards, and supervised all incident reporting for the unit.

PROJECTS & COMPETITIONS

- Digital Forensics Investigation Report — Conducted a simulated forensic analysis of a compromised machine using FTK Imager, Autopsy, Wireshark, Kernel Outlook PST Viewer, and Eric Zimmerman's forensic tools (Registry Explorer); received an A+.
- Snort IDS — Built and tuned custom Snort rules to detect fragmentation overlap, abnormal TCP segmentation, and port scans; validated alerts against crafted traffic using Wireshark.
- IEEE CyberHawks & National Cyber League — Hands-on enumeration, exploitation, OSINT, and digital forensics using Burp Suite, Hydra, Metasploit, Sysmon, and Linux privilege escalation; placed 3rd with team at IEEE CyberHawks.

LANGUAGES & TECHNOLOGIES

Security Tools: Wireshark, Nmap, Burp Suite, Metasploit, Snort, IDS/IPS, Splunk, Nessus, Tenable Security Center

Forensics Tools: FTK Imager, Autopsy, Eric Zimmerman's Forensic Tools, Kernel Outlook PST Viewer

Systems & Cloud: Windows, Linux, Active Directory / Azure AD, Microsoft 365, Intune, TCP/IP

Security Operations: KnowBe4, Microsoft Purview, AWS CLI

Programming & AI Tools: Python, Java, Bash, C, JavaScript, PowerShell, Claude Code, GitHub Copilot

Risk & Compliance: NIST CSF, CIS Controls
